

GTS side window protectors are designed to create a cool and noiseless vehicle interior while giving your vehicle a sleek aerodynamic look. Made of GTS proprietary Compositelite material, the side window guards attach without any drilling or modification to your vehicle. Custom designed for a perfect fit, these side window guards reduce window fogging and refresh the air within the vehicle interior. The GTS Vent Gard provides

wider coverage allowing for greater window opening without loss of rain and wind protection. The GTS Sport Gard provides a narrower more aerodynamic look while maintaining superior coverage. Most applications are available in both smoke and carbon fiber. Available for cars, trucks, and SUVs in both 2 door and 4 door fitments. Comes complete with instructions and 3M installation tape.

- Fresh air comfort in all weather
- Available for most cars and trucks
- Helps eliminate window fogging
- Easy “No-Holes-To-Drill” installation
- Limited Lifetime Warranty
- Reduces wind noise, drafts, and glare
- Lower profile than Vent-Gard
